Linda McMahon: Could Cut Medicare Benefits So Big Oil Can Make Even More Money

Linda McMahon does not share our values. While Big Oil companies are already raking in record profits, McMahon is proposing to give them another \$2.3 billion in taxpayer-funded handouts.¹ But for the millions of seniors who rely on Medicare, McMahon said she's open to voting for a controversial budget that:

- ✗ Guts Medicare benefits²
- ✗ Requires seniors to negotiate directly with insurance company bureaucrats³
- ✗ Could force seniors to pay \$6,400 more per year for health care⁴
