**“Congresswoman Wilson,
why isn’t the water
safe to drink?”**

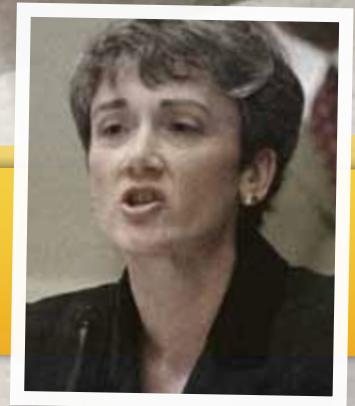

Congresswoman Heather Wilson Pockets Cash From Big Oil While They Pollute Our Drinking Water

Wilson has taken tens of thousands of dollars from three producers of MTBE, a dangerous chemical the EPA says may cause cancer.¹ These toxic chemicals have polluted New Mexico's water supply, even the water our kids drink at school.² But Wilson voted **FOUR TIMES** to ensure that these polluters went unpunished.³

**VOTE NO ON HEATHER WILSON:
SHE SIDES WITH BIG OIL, NOT US**
